Gulam

I purchased the new material and after Disc 15 a light from heaven came down and hit me in the head and I finally get it. My problem was I could not see from the larger time frame down to the smaller frame. I now see it..... I finally understand the gartley. I was getting killed going the wrong direction of the trend thinking the gartley was the direction when really it was just the retracement. I didn't know this before the light came on. Thanks A Million."
